EDUCATION

National Institute of Technology **Dec 2020 – Jun 2024**
Bachelor of Technology in Electronics and Communication Engineering, Kurukshetra, Haryana *CGPA: 8*
Kendriya Vidyalaya **Mar 2019 – Mar 2020**
Intermediate, Bareilly, UP *Percentage: 80*

TECHNICAL SKILLS

Programming & Querying: Python, SQL
Libraries & Frameworks: Pandas, NumPy, Matplotlib
Data Analysis & Processing: Data Cleaning, Data Visualization, Statistical Analysis
Tools & Databases: Power BI, Advanced Excel, MySQL
Soft Skills: Analytical thinking, Problem-Solving, Effective Communication

PROJECTS

Machine Learning-Based Loan Eligibility Prediction

- **Developed a supervised learning model** using **Decision Tree and Naïve Bayes classification** to predict **loan eligibility** based on key factors like **income, credit history, loan amount, and dependents**.
- **Implemented Decision Tree classification** where **nodes represent attributes, branches show outcomes, and leaf nodes indicate approval or** denial, allowing for a structured **Yes/No decision-making process**.
- **Utilized key attribute selection measures** such as **Entropy, Information Gain, Gini Index, and Gain Ratio** to enhance **classification accuracy and feature importance ranking**.
- **Applied Naïve Bayes classification**, a **probabilistic machine learning algorithm**, assuming **independent and equal feature contributions**, ensuring **fast, accurate, and reliable loan approval predictions**.
- **Used Python and essential libraries** (**Pandas, NumPy, Matplotlib, Scikit-learn**) for **data processing, visualization, and predictive modeling**, optimizing **data analysis and trend identification**.

Power BI HR Dashboard – Employee Retention & Attrition Trends

- **Developed a Power BI dashboard** to analyze **employee attrition trends**, helping organizations **improve employee performance and retention** by identifying key factors influencing workforce turnover.
- **Performed ETL and data cleaning** by **removing duplicates, handling missing values, correcting data types, and standardizing text**, ensuring **data accuracy and consistency for reliable HR analytics**.
- **Created new calculated columns** like **AttritionCount and AttritionRate** using **DAX formulas**, enabling precise **attrition tracking and comparative analysis across employee demographics**.
- **Designed key HR KPIs**, including **overall employees, attrition count, attrition rate, average age, average salary, and years at company**, providing **data-driven insights into employee turnover patterns**.
- **Implemented various visualizations**, such as **donut charts, bar graphs, stacked bar charts, matrices, and area graphs**, to effectively display **attrition trends by age, salary, education, and job role**.

CERTIFICATIONS

- **Power BI for Data Analytics** – Successfully completed a comprehensive **Power BI** course on **Udemy**, gaining expertise in data visualization, dashboard creation, and business intelligence reporting.
- **Excel for Data & Analytics Certification** – Earned a professional certification from **Chegg**, mastering **data analysis, pivot tables, data cleaning, and advanced Excel functions** for business insights.
- Completed a comprehensive **Data Analytics** course from **Simplilearn**, gaining expertise in **data cleaning, visualization, SQL, Excel, and Python**. Earned **certification**, validating proficiency in **analytical techniques** and **business intelligence tools**.
